4-H Story

Your story is an important part of your 4-H record. The introductory paragraph could include reasons for joining 4-H, interesting aspects of 4-H, and how you have helped other 4-H members. It should focus on the projects or activities in which your record book is to be considered for special awards, project awards or certificates. You may include reason(s) for selecting the projects, new things learned, and plans for the future. The story should be a minimum of one page with a maximum of three pages.

Hello my name is Joe Smith. I am 11 years old and in the 6th grade at Pawnee Grade School. I live on a small farm with my parents Betty and James Smith and my two brothers Billy and Bobby.

I joined 4-H when I was 9 years old. I had heard a lot about it and how much fun it was to go to 4-H camp. I also heard my friends talk about their older brothers and sisters showing livestock and that sounded fun also.

My projects in 4-H are livestock, shooting sports, gardening and horticulture and public speaking. The reasons I chose these projects is because I am very interested in learning about them and how they can help me choose a career when I am an adult.

My Livestock project started out with me going and buying a registered Angus heifer. I chose Angus because that is what my dad had when he was growing up and he really like them. I chose a heifer over a steer because it cost so much to have a beef project and when you are done showing a steer he goes to slaughter and you have to start all over again. With a heifer I will be able to show her for about two years and then put her out in the pasture and raise calves out of her. My plans are to buy about 5 heifers over the years, show them and then breed them and hopefully raise some good show calves. I bought my second heifer a year ago and am showing her now. My first heifer is bred and due to calve in about 4 months. This will also help me save money for going to college.

It was a lot of fun starting a beef project and the things I have learned will help me all through life. We started out building a pen for my heifer and getting the feed trough and water trough ready for when we brought her home. We made sure her stall was big enough for her to stand up and lay down without any problems. Also we wanted to make sure her exercise pen was big enough for her to get out and run around if she wanted. She likes to do that on those cool evenings when I turn her out.

I keep my show heifer up in her stall all day with a fan and mister blowing on her to keep her cool and help grow hair. Show calves have to have a lot of hair so they can be

groomed and made to look real pretty. I do not let my heifer ever get out in the sun light as that will cause her to shed her hair. So she is turned out every evening after the sun has gone down.

My family really enjoys going to livestock shows. We have met a lot of nice people and have received a lot of help and advice for those that have been showing livestock for a long time. I have done pretty well the past 3 years showing my heifers. I have won some Breed and Reserve Breed champions but never a Supreme Heifer Trophy. I will keep working hard and hopefully one win one.

My other favorite project is shooting sports. I have been through the shotgun safety class and am now shooting trap and skeet in contest. I really like this it is so much fun and I have learned a lot on how to correctly hold and handle a gun. My instructors are constantly stressing safety and how it is the most important thing if you are going to be involved in the shooting sports project. This project has helped me be most conscious about safety when I am out hunting squirrels, rabbits, quail and deer. I also stress safety to all my friends and how they can be safer when handling guns.

I have entered 6 trap contests and done ok. My average score is 42. Haven't placed in any contest yet but will keep practicing.

I also enjoy the gardening project. My family always plants a large garden so we can have fresh vegetables to eat and more to can. We plant just about everything. Of course we have tomatoes and my dad is always bragging to his friends about how big they are and how many we are getting. We also have okra, corn, green beans, onions, peppers, cucumbers, squash, potatoes, and of course my favorite ones watermelons and cantaloupes.

My brothers and I help with the weeding, watering and harvesting of the vegetables. We also help clean and get them ready to freeze or can. I enjoy helping my mom can the vegetables. I love canned okra so I make sure she does a lot of that. The part I hate the worst is cleaning the corn. We have to make sure we get all the silks off before they are washed and cooked.

We all really like the fresh cantaloupe and watermelons. Those are great, I wish there was a way to preserve them so we could have some of them in the winter time. I have learned a lot about gardening from helping with the garden. I have learned how to plant seeds and plants and how to fertilize and water. We also mulch our garden to help preserve the moisture and also to keep weeds from growing.

Our family has also helped get a community garden started for people with low incomes, large families and those who do not have a place for a garden. It feels good to help people and

see their expressions when they harvest the fresh vegetables.

Another project I am involved in wasn't by choice. When I joined 4-H Mr. Fimple told my club about public speaking and encouraged us all to get involved in it. He said it was the best project we could be involved in. He said that it would help us all through our careers and that every one of us would need it. I didn't care what he said I was still not going to do that project, but my mom and dad said I was so now I am involved in the Public Speaking project.

I was very scared the first time I gave a speech to my 4-H club. I felt like I was going to faint. Yes I did forget part of it but I made it through it and nobody laughed at me, I was afraid they would. It is getting easier the more I do it and I am kind of proud of myself for doing it. Other kids say they can't believe I can get up in front of a group and give a speech. I have given speeches around 9 times.

I am going to keep working on this and hopefully win some scholarships when I get older. I was looking and there are a lot of opportunities out there to give speeches for scholarships and other awards. But the best award I could ask for from doing this project is gaining confidence in myself and believing I can do anything I set my mind too.
