Cow-Calf Production Record Software

Courtney Bir

Assistant Professor,
 Department of Agricultural Economics

Brent Ladd

Assistant Extension Specialist,
 Agricultural Economics

Producers who have computers frequently ask about the availability of software programs to handle cow-calf production records. Before purchasing a software program, it is important to analyze the value of such a system with regards to making better management decisions. Producers should evaluate their existing records to determine the types of information sought from a software program. Are inventory records important? Are summary reports of primary interest? By considering specific record needs, the producer is better equipped to choose an appropriate software package. The hardest steps to valuable recordkeeping are (1) making time for recordkeeping, (2) determining the herd information that is economically feasible to collect and (3) summarizing the herd data for use in the decision-making process.

If the cow-calf operator is not currently keeping any records on herd performance, a good starting point may be some basic calf crop records, cow information (if individual identification is used), calving and weaning percentages, inventory numbers, number of females exposed to the bull(s), etc. Seedstock and commercial cow-calf producers have different needs. Also, herd size can influence the degree of detail that a producer is willing or able to assemble on the cattle.

Meaningful cow-calf records may be handwritten or computerized. Monthly calendars, journals and Integrated Resource Management Redbooks are a few examples of handwritten record systems. The choice of programs, features, and cost of software are the "fine-tuning" portion of recordkeeping. In the following summary of nine commercially available cow-calf software packages, the features are described under six headings:

- Cow Information
- Sire Information
- Calf Information
- Herd Information
- Computer Requirements
- Additional Considerations

Some programs are a one-time purchase while others require annual or monthly subscriptions. The program costs range from \$149 to \$600 for a one-time purchase. Subscriptions

range from \$4.85/month to \$85/month and \$40/year to \$950/year. Many software companies offer program demonstration copies for free. Programs have various computer requirements such as minimum processor type and speed, minimum RAM, operating system, hard disk space and monitor needs. Most programs provide comprehensive cow, calf and sire data entry fields as well as herd production summaries.

Many of the programs accommodate both commercial and seedstock cattle needs. Seedstock producers should check with their breed association for software package availability and recommendations prior to purchasing software for registered cattle records.

Before purchasing any software, determine the level and cost of software support that will be provided by the company. In addition, some programs have specific cattle information that is required before the program will work. Sorting applications and the type of reports generated may vary, but in many cases producers have the opportunity to customize reports to meet specific needs. Another important feature may include the ability to query or search the data for specific animal information. Every cow-calf operator must determine the amount of time available to devote to practical recordkeeping and weigh this commitment against software costs, data entry features and desired summary reports.

Information provided about the following programs was taken from software websites. Oklahoma State University does not endorse the software programs listed in this publication, but the information is believed to be true. The summary does not cover all available packages or individual program features. Programs may have other capabilities that are not described in the summary. Producers should contact the respective companies for purchase information, details on features and specific hardware requirements.

ADDITIONAL CONSIDERATIONS

	Cow Calf Manager Commercial	Ranch Manager Open	CattleMax Online	Cow Sense Nx Gen EZ & Pro
Sorting options provided by the program?	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information. ID and Animal Type.	Sort, filter, and print based on any piece of information.
Specific data entry fields that are required for program to work.	No.	ID, location, group, characteristics, event information	No.	Only requires Animal Type and Status.
Does the program generate Standardized Performance Analysis (SPA) values? If yes, are they production values, financial values, or both?	Export of animal data to PDF or Excel file.	Yes, production.		Yes, the production report is pending.
Is the program integrated with other agricultural software?	Data synchronizes to affiliated breed association registry.	Support for AllFlex and iDology wand readers.	Microsoft Excel, electronic ID readers, cattle weight scales, and most popular breed associations.	Included import tool allows user to import data to update existing records and/or create a Cow Sense herd from any other existing data source. Export and import to/from spreadsheet, word processor, financial programs, and multiple other formats. Interface for Cow Sense allows for the collection of data in the field. Interface with sale manager for customer and sale management.
Does the program have the capability or do you plan to develop the capability to accept farm level inputs from electronic ID systems or interface with input from databases generated by electronic ID systems?	No.	The software has the capability to import and export farm level inputs from electronic ID systems and is capable of interfacing with databases generated by electronic ID systems.	Interfaces with EID readers and records EID tag numbers. In addition, the software will be updated as additional EID systems are introduced.	Yes, real time (active) chute side interfaces with EID readers and in addition, other electronic measurement devices such as scale indicators, label printers, electronic tape measures, LED signs, electronic thermometers and other serial devices. In addition, Tag Wizard in Cow Sense will import a list of EID's from a manufacturer's file and print a tagging field form to link visual tag with EID. Cow Sense also offers a passive solution to seamlessly import data from electronic ID systems, EID readers and/or scale indicators.
Is the program NCBA SPA accredited and if yes, Production Report, Financial Report, or both?	No.	No.	No.	Yes, Cow Sense was the first commercially developed program to be SPA accredited, with our Production Report.

Sorting options provided by the program?	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information.	Sort, filter, and print based on any piece of information.	Ascending, descending shorts and user defined filters or use of standard filters.
Specific data entry fields that are required for program to work.	Cows and Bulls: Animal ID & type, birth date. Calves: also require sex and outcome.	Birthdate, sex, sire, and dam.	ID.	Birthdate, sex, sire, dam, purchased/raised/AI	ID, duplicate IDs not allowed for active records	Gender, birth date, location, form of ID.
Does the program generate Standardized Performance Analysis (SPA) values? If yes, are they production values, financial values, or both?	No.	No.	Yes, production.	Yes, production.	No	Yes—both.
Is the program integrated with other agricultural software?	No.	Export to and Import from Microsoft Excel.	Breed Associations module for EPDs (will be able to download a scale module off the Internet). Exports to Microsoft™ Excel and other file formats (html, pdf, rtf, text).	Flexible imports of scale information from all ASCII files. Export to Excel (.rsv format)	Several breed associations for automated updates and exporting data to associations (Angus, Hereford, Red Angus, Brangus, Charolais and Limousin). Reports can be exported to Microsoft Excel, Word and PDF. Tab delimited files can also be created.	Yes
Does the program have the capability or do you plan to develop the capability to accept farm level inputs from electronic ID systems or interface with input from databases generated by electronic ID systems?	No.	Yes, EID numbers can be imported from Microsoft Excel	Yes.	Can accept inputs, but cannot interface with databases at this time.	System handles EIDs	Yes. Can interface via bluetooth or by importing cvs files from other systems.
Is the program NCBA SPA accredited and if yes, Production Report, Financial Report, or both?	No.	No.	No.	No.	No.	No.

ADDITIONAL CONSIDERATIONS

Cow Calf Manager Commercial

Does the program currently have the capability or do you plan to develop the capability to output information (e.g., to industry databases) to an animal ID database or other animal information systems that may develop in the industry?

Ranch Manager Open

Yes.

CattleMax Online

CattleMax Online currently exports data to breed associations. As industry databases and standards are developed, CattleMax Online will be updated to accommodate data exchange.

Cow Sense Nx Gen EZ & Pro

Current interface with Cow Sense Online provide for the submission of data to a secure internet site for comparative analysis and benchmarking. The Send/Retrieve Herd File as well as Remote Backup Service provides for the seamless transfer of whole herd data to Midwest MicroSystems for assistance, analysis or safe data storage. Interfaces with private databases through Cow Sense Premium Interface Component (PIC). Data exchange with multiple Breed Associations exists for submission of registration and performance data as well as receiving data updates from associations. The individual performance and health records can be uploaded to feedlots and feeding performance and carcass data can be retrieved back into Cow Sense as well. Upload of information for age and source verification through Cow Sense Verified Micro Beef PVP. Shipping report can be printed or exported. As additional public databases are USDA approved, required information will be delivered in the same fashion.

Does the program store 15-digit identifications (such as NAIS numbers) in addition to other animal identifications?	Yes.	Yes. Allows multiple IDs.	Yes	Yes. (See previous question regarding EID systems for more detail.)
Can electronic identifications be read directly into your software? Or is the purchase of companion software necessary for this purpose?	Yes. Included within the program.	Yes	All CattleMax Online editions can read EIDs directly.	Yes, our Tag Wizard offers a manual option for users. However, our Companion products of Pocket Cow Sense and Cow COMM Chute-side provide users realtime automation.
Will scanning of an electronic ID recall previously recorded management information?	Yes, retrieves and displays record for animal upon scan of IED tag.	Yes	Yes	Yes. Cow Sense provides the ability to use past and present data in combination to assist in management decisions while the animal is captive. For example, when a cow with EID is scanned at preg check, her current breeding data is displayed (as well as other past data recorded). Another example would be the instantaneous calculation and display of ADG and WDA once a calf is scanned and weighed. The Auto Sort function allows the user to customize and pre-assign a sort routine using previous data points in combination with current data to automatically call a sort to user defined criteria.
Grouping of Cattle and group editing	Yes	Yes	Yes	Yes
User defined data entry fields/ User customized data fields	Yes	Yes	Yes	Yes

Pedigree trees	Yes.	No.	Yes.	Yes.		No.

Smartphone Application and Mobile Use

CattleMax Online	Cattle Max Online for iPhone® and Android \$9/month and up.
CattlePro	PDF reports can be sent and opened with smartphones.
Ranch Manager Open	Ranch Manager cloud for any device with internet access. iPhone and Android \$39.99/year.
Cow Calf Manager	Windows tablets natively, iOS and Android through apps. One-time only fee for an on-going subscription and data entry using mobile apps. Used in conjunction with computer program with a with cloud access for mobile devices.
CowSense	Mobile field data collection.
CowSense Online	A web-based version offering data entry and reporting to users that prefer a cloud solution. Add records, edit data, and create critical management reports for cowherds from any computer with an internet connection. \$4.95/month.
Go360 bioTrack	Mobile Access to data browser based (Chrome preferred) or mobile application. Android, iPhone/iPad/iPod and Microsoft - any device with access to the Internet. Go360 option allows full use outside internet range. Pricing based on herd size with no limits to number of SmartPhones accessing information and reports (add, edit, look up) branded with your logo/Brand. Go360 option for 100 cow herd is \$16.99 per month for on-going subscription. Unlimited user access.
Critter Works	Critter Works is available on any device with internet access. \$6.95/month.

- **All programs have on-screen or printed input forms, as well as on-screen/printed summary reports available.**
- **Almost all of the programs are designed for both commercial and registered (seedstock, pure-bred) cow herd types.**
- **Free-format comment areas (note pages) are available.**
- **User defined fields, when available, allow input of data not otherwise specified. For example, if the vendor representative indicated 'no' for 'management code,' a user-defined entry field could be added for these data.**

Other Resources

Some of the programs generate Standardized Performance Analysis (SPA) production values. Additional information on SPA is available in this OSU Fact Sheet:

The Oklahoma Cooperative Extension Service

Bringing the University to You!

The Cooperative Extension Service is the largest, most successful informal educational organization in the world. It is a nationwide system funded and guided by a partnership of federal, state, and local governments that delivers information to help people help themselves through the land-grant university system.

Extension carries out programs in the broad categories of agriculture, natural resources and environment; family and consumer sciences; 4-H and other youth; and community resource development. Extension staff members live and work among the people they serve to help stimulate and educate Americans to plan ahead and cope with their problems.

Some characteristics of the Cooperative Extension system are:

- The federal, state, and local governments cooperatively share in its financial support and program direction.
- It is administered by the land-grant university as designated by the state legislature through an Extension director.
- Extension programs are nonpolitical, objective, and research-based information.
- It provides practical, problem-oriented education for people of all ages. It is designated to take the knowledge of the university to those persons who do not or cannot participate in the formal classroom instruction of the university.
- It utilizes research from university, government, and other sources to help people make their own decisions.
- More than a million volunteers help multiply the impact of the Extension professional staff.
- It dispenses no funds to the public.
- It is not a regulatory agency, but it does inform people of regulations and of their options in meeting them.
- Local programs are developed and carried out in full recognition of national problems and goals.
- The Extension staff educates people through personal contacts, meetings, demonstrations, and the mass media.
- Extension has the built-in flexibility to adjust its programs and subject matter to meet new needs. Activities shift from year to year as citizen groups and Extension workers close to the problems advise changes.

The information given herein is for educational purposes only. Reference to commercial products or trade names is made with the understanding that no discrimination is intended and no endorsement by the Cooperative Extension Service is implied.

Oklahoma State University, in compliance with Title VI and VII of the Civil Rights Act of 1964, Executive Order 11246 as amended, Title IX of the Education Amendments of 1972, Americans with Disabilities Act of 1990, and other federal laws and regulations, does not discriminate on the basis of race, color, national origin, gender, age, religion, disability, or status as a veteran in any of its policies, practices, or procedures. This includes but is not limited to admissions, employment, financial aid, and educational services.

Issued in furtherance of Cooperative Extension work, acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture, Director of Cooperative Extension Service, Oklahoma State University, Stillwater, Oklahoma. This publication is printed and issued by Oklahoma State University as authorized by the Vice President, Dean, and Director of the Division of Agricultural Sciences and Natural Resources and has been prepared and distributed at a cost of \$1.50 per copy.
