- Financial hardship
- · Qualified reservist distribution
- Qualified birth or adoption distribution
- · Certain distributions of lifetime income investments

ISSUE 2: SOCIAL SECURITY PLANNING

P.P. 377

<u>Definitions</u>

- Average Indexed Monthly Earnings (AIME) Index workers earnings to reflect changes up to 35 years. Selects highest indexed earnings, sums, then divides by # months in those years.
- Bend Points \$ amounts of % of AIME used to calculate PIA changes
- Full Retirement Age (FRA) = birth Yr. 1937 & earlier, FRA = 65, '43-'55 FRA increases 2 mos. per year to age 66; 1960 & later. incr. 2 mos. per year until age 67
- Indexed Earnings: Earnings indexed to avg. wage level 2 yrs. prior to year of 1st
- Primary Insurance Amount (PIA): Benefit received at FRA w/o reduction in benefits
- Retirement Age: Age 62, with permanent reduction of benefits.

SOCIAL SECURITY CALCULATION

PIA (Primary Insurance Amount) formula

For an individual who first becomes eligible for old-age insurance benefits or disability insurance benefits in 2021, or who dies in 2021 before becoming eligible for benefits, his/her PIA will be the sum of:
(a) 90 percent of the first \$996 of his/her average indexed monthly earnings

(AIME), plus(b) 32 percent of his/her average indexed monthly earnings over \$996 and through \$6,002, plus(c) 15 percent of his/her average indexed monthly earnings over \$6,002.

Computation of 2021 bend points: First bend point; \$180 times 54,099,99 divided by 9,779.44 equals \$995.76, which rounds to \$996. Second bend point \$1,085 times 54,099,99 divided by 9,779.44 equals \$6,002.23, which rounds to \$6,002

SOCIAL SECURITY CALCULATION

If the taxpayer has a traditional IRA with deductible contributions, the basis in a newly established IRA will be allocated among the new and any existing IRAs, increasing the amount of tax the taxpayer must pay when a conversion is executed.

BASIS ALLOCATION WITH MULTIPLE IRAS

Example 10.16- P.391 Multiple IRAs

See Figure 10.12 P.392 –P. 393 for the calculation of basis: \$5,829

Taxable amount is \$5,929

Observation – P. 393 - IRA Basis and Value

It is important for the tax practitioner to obtain information about all the taxpayer's IRAs **because** basis is divided among all IRA's.

• Unrelated Debt Financed Income (UDFI) > \$1,000, file F-990-T

Ex. 10.19, Pg. 397 Unrelated Debt-Financed Income

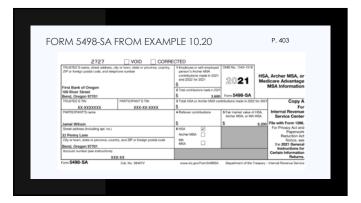

Rebecca's IRA has a \$100,000 balance, purchases rental prop. for \$125,000, IRA borrows
\$35,000, Yr. 1 IRA collected \$11,400 rent, had \$3,000 property expense. Avg. adj. basis of the property or yr. 1 was \$120,000. UDFI for yr. 1 Ratio (debt to val. of prop.)is calculated:
\$30,000/120,000 = 25

.25 X \$11,400 rent inc. = \$2,850. Rent Exp. = .25 X 3,000 or \$750. + \$1,000 specific deduction.
