Notes: Grain yield and protein concentration were adjusted to 12% moisture content. a: Shaded values are not statistically different from the highest value within a column. Plots were grazed from November 17 to December 30, 2025, and from January 15 to March 9, 2026, at a stocking rate of 154 pounds of animal BW per acre. Cattle were temporarily removed in early January due to insufficient forage availability resulting from drought conditions. Double-dashes "--" = data not available.
