

Hooker Regional Wheat Variety Trial 2022-2023

wheat.okstate.edu

Cooperator: Ernest & Dan Herald

Extension Educator: Dr. Britt Hicks

Planting & harvest dates: 10/10/2022, not harvested.

Previous crop: Grain sorghum

Management: Grain-only

Soil Type: Dalhart fine sandy loam

Tillage: Conventional

Soil test: pH=7.4, N= 98, P= 206, K= 725

Note: Similar to many wheat fields in the region, this trial experienced severe drought stress throughout the growing season, with significant plant mortality. Thus, this site was not harvested in 2023. For harvest results in previous year for this location, go to <http://wheat.okstate.edu/variety-testing/grain-yield>. We thank everyone involved for their time.
