OSU EXTENSION LISTENS TO OUR COMMUNITIES

Findings From A Regional Community Engagement Forum Hosted In Texas County

Texas County
In spring and summer 2019, OSU Extension hosted community forums at sites across the state of Oklahoma. The forums sought to ensure that a wide range of community members were engaged so that their opinions and perspectives on important issues would be represented in OSU Extension's strategic planning.

More than 400 people participated in one of the 16 OSU Extension community forums. They were asked to provide input on what they thought the most important issues facing their communities were going to be over the next 3 to 5 years. They were specifically asked about issues related to Families, Youth and Children, and about issues related to their Community, Economy (Farms and Businesses) and Natural/Environmental Resources. Based on the results of the community forums, researchers at OSU provided site hosts with results specific to their communities, as well as perspective on issues that came up as common themes statewide.

The forum results are summarized in a series of handouts and on the OSU Extension website. Extension educators will be using their results to engage the community in action planning around the identified issues and action ideas. Trainings for follow-up engagement activities are being offered to Extension educators so they will have an even greater ability to engage their communities authentically and effectively.

Results can be found online at extension.okstate.edu/communityforums.
