County Government Financial Trends Report for Caddo County

Introduction

The financial trends of Caddo County government are reviewed in this report.¹ The review covers fiscal years 2000-2012. General Fund total revenues and expenditures are presented in nominal (actual) and real (inflation adjusted²) dollars. General Fund expenditure accounts are delineated. General Fund expenditures are also reported per capita to give an estimate of the average cost of county services for each citizen. Assessed values of real, personal, and public service property classes are presented, as well as, other sources of General Fund revenues.

Total Road Fund revenues and expenditures are presented in actual and inflation adjusted dollars. Trends in the primary revenue sources are analyzed. Road expenditures per mile of road are reported in order to aid analysis of the cost of providing and maintaining county roads.

Summary and Conclusions

- **General Fund revenues** rose 64.04% between fiscal years 2000 and 2012. At the same time, prices (inflation) increased 29.95% (as measured by the GDP implicit price deflator).
- General Fund expenditures rose 35.99%.

General Fund property tax revenues rose 46.99% over the period. Ad valorem revenues made up 50% of General Fund revenues in fiscal year 2012.

General Fund revenues from "all other sources" increased 74.33% over the study period, primarily due to sales tax revenue growth.

- **Road Funds revenues** increased 81.94% between fiscal years 2000 and 2012. This is more than the 29.95% inflation.
- **Road Funds expenditures** grew 136.16% from 2000 to 2012. Expenditures per mile of road rose by 140.24%.

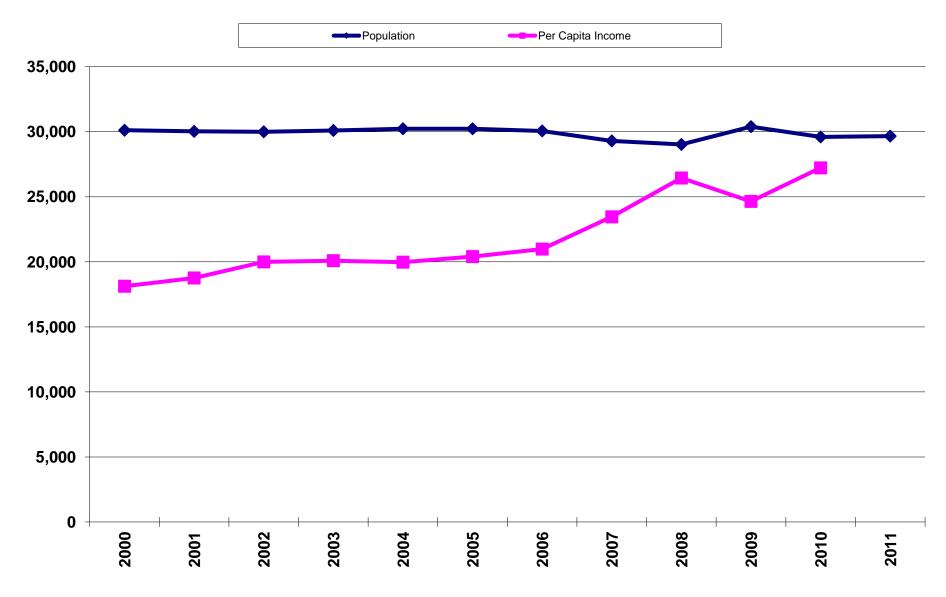

Road Funds revenues from gross production taxes rose faster than inflation. Road Fund revenues from gasoline, special fuel and motor vehicle fees (that decreased over time) composed 44% of total road revenue in 2012.

- The Caddo County **population** is estimated to have decreased 1.49% from 2000 to 2011.
- **Per capita personal income** is estimated to have grown 50.19% from 2000 to 2010. This average growth is more than the 26.65% inflation (from consumer price index) from 2000-2010.
- In conclusion, both County General Fund revenue and Highway Fund revenue more than kept pace with rising prices.
- Appendix B shows a decrease in the General Fund Balance of 15.4% and an increase in the Road Fund Balance of 40.50% from 2000-2012. These are unencumbered funds carried forward to the next fiscal year.
- Table 4 shows the 136.75% growth in the county sales tax collections from 2000-2012. This growth far exceeds the rate of rising prices. Appendix C shows use tax collections.

¹ The primary source of data is the County Estimate of Needs and Financial Statement for each fiscal year. All sources of information are listed on page 18.

 $^{^2}$ The index used to adjust all dollar figures to 2000 dollars is the gross national product implicit price deflator. It considers a broad range of goods and services (broader than the consumer price index). The index is published by the U.S. Dept. of Commerce. The index numbers are provided in the Appendix.

Figure 1. Population and Percapita Income, FY 2000-2011

Caddo County Demographics

The Caddo County population increased over the 2000-2011 period. (Figure 1) The population decreased about 1.49% from 2000 to 2011 (Table 1), decreasing .14% per year on average. Per Capita Income rose 50.19% from 2000 to 2010. Prices of goods and services increased 26.65% (CPI) due to inflation during that period (Appendix).

Table 1. County Population and Personal Income, 2000 - 2011

* Source: Bureau of Economic Analysis and U.S. Dept. of Commerce

Bureau of the Census and Federal Reserve Bank (http://research.stlouisfed.org/).

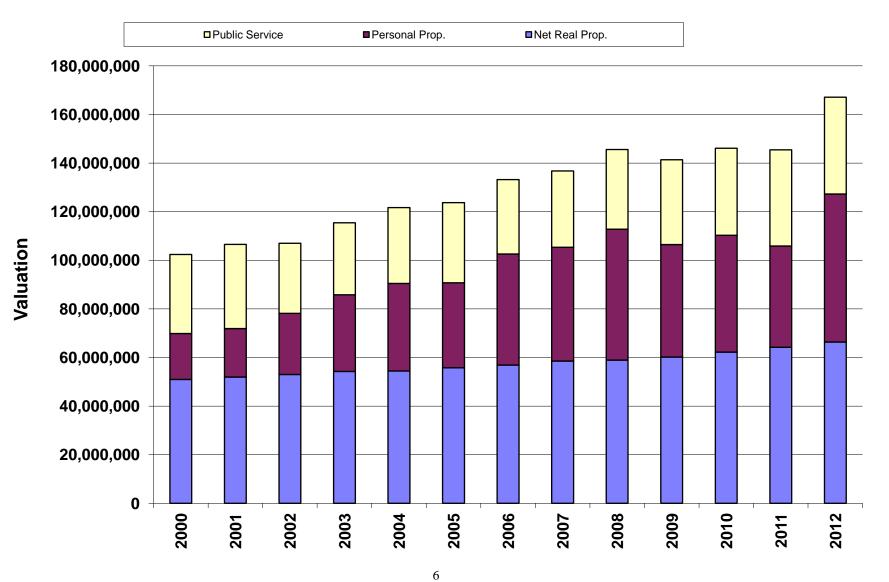

General fund revenues increased 64.04% from fiscal 2000 to fiscal 2012 while expenditures increased 35.99%. Accounting for inflation, revenues increased 26.23% (Table 2). Ad valorem revenues constitute 50% of general fund revenues and increased 46.99% from 2000 to 2012. "Other Revenues" increased 74.33% (Table 2). Per capita percent changes show larger changes due to the decreased population over the period (Table 2).

 Table 2. General Fund Revenues and Expenditures, FY 2000 - 2012

Note: Total revenues is not necessarily equal to total collections since it doesn't include adjustments.

General Fund Sources of Revenue

These revenue and expenditure trends can be evaluated further by looking at the sources of revenue. The primary source of county General Fund revenue in most counties is the ad valorem tax. Figure 3 shows the change in taxable value by property class from 2000 through 2012. Note that net real property constitutes the largest portion of the tax base in recent years. Since the mill rate and assessment ratios change infrequently, appreciable change in general fund revenue results from a change in taxable value. (In recent years, many counties have chosen to adopt a county sales tax when stagnant real estate values have resulted in insufficient ad valorem revenues.)

Taxable value increased 63.23% between 2000 and 2012 (Table 3). Personal Property value rose 222.03% thanks to a large increase from 2011 to 2012. Net Real Property valuation rose 30.29%. Public service property valuation increased 22.52%. On a per person basis, net real property value increased 32.26%. Total value per person rose 65.70%. Thus, for the average citizen, property value increased more than the estimated 29.95% inflation (IPD, GDP index) from 2000-2012.

Table 4 shows the magnitude of change over time in several non-ad valorem revenue sources. These figures include fees and various reimbursements. Among the sources of income listed in Table 4, Revaluation Reimbursement increased most, 152.43%. Interest on Investments decreased the most. Altogether, these sources of revenue increase 74.33%, primarily due to growth in sales tax revenue.

| | Co. Clerk | County Sales | Interest on | Revaluation | Other Sources | |

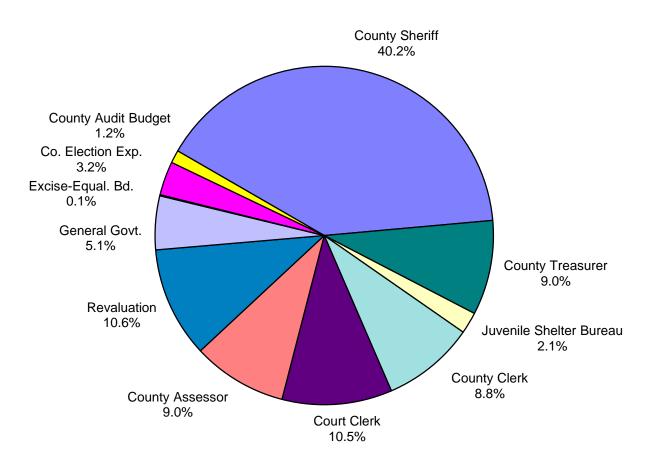

Figure 4. Proportionate Shares of the General Fund Allocated Among the Various County Government Services, FY 2012 Expenditures

Figure 4 shows that "Sheriff," "Revaluation of Reimbursements," and "Court Clerk" are the largest expenditure accounts. All accounts, except the District Attorney, County Clerk, and General Government Fund show increased expenditures (Table 5) over the period. After adjusting for inflation, however, Juvenile Shelter Bureau and Excise-Equalization Board also show declines. Per capita expenditures are shown at the bottom of Table 5. County Sheriff and General Government together cost \$37.53 per person in 2012, 45.40% of the total.

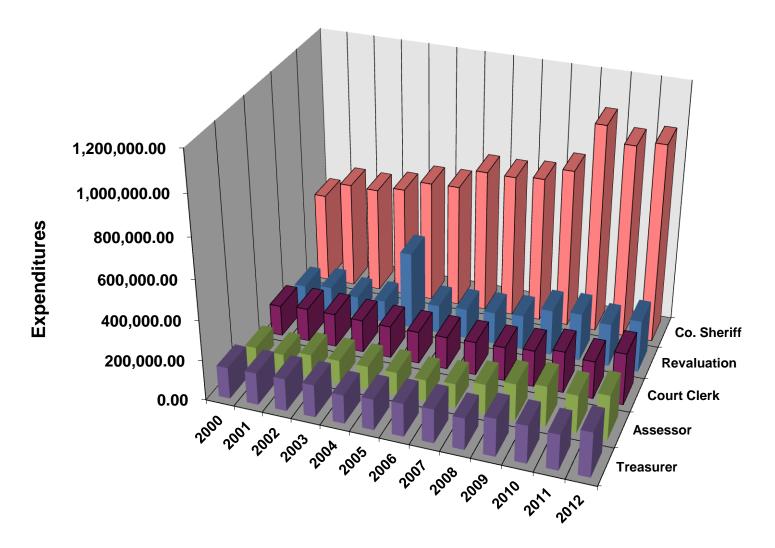

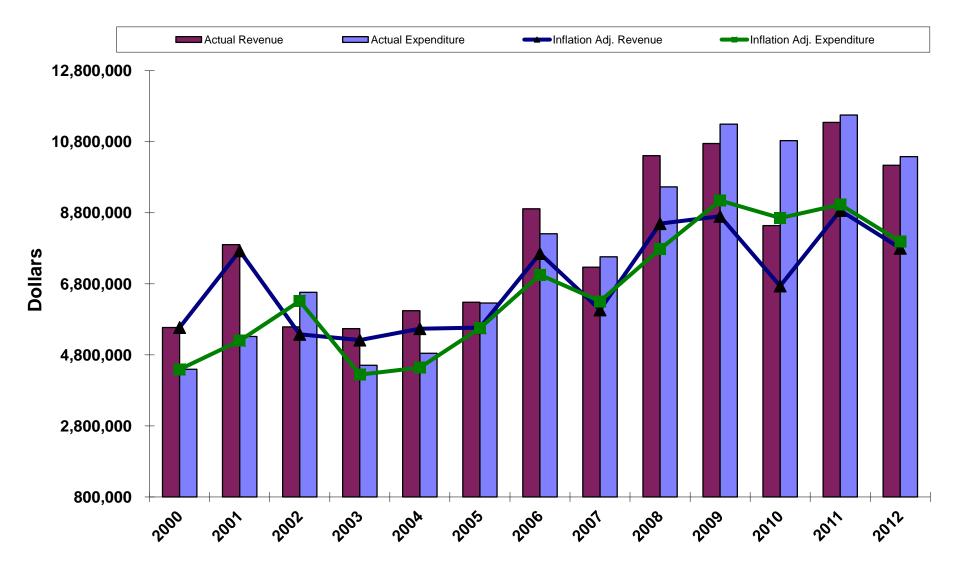

Figure 5. Trends in the Five Largest General Fund Expenditure Accounts, FY 2000-2012

Figure 5 shows the relative magnitude of the five largest expenditure accounts. All five accounts grew, with Revaluation of Reimbursements increasing the largest percentage, while the County Treasurer increased the least (Table 6). Table 6 shows the actual dollar amounts for each account and the per capita expenditures for these five largest accounts.

Figure 6. Road Fund Revenues and Expenditures, Actual and Inflation Adjusted, FY 2000-2012

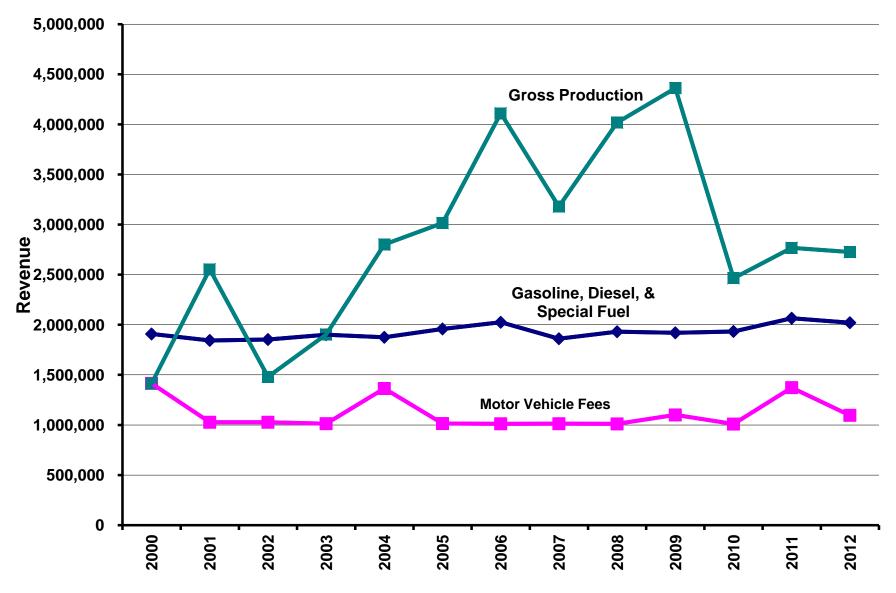

County Road Fund Revenue and Expenditures

Total county road revenues and expenditures, both in actual and inflation adjusted dollars, are depicted in Figure 6. These include both restricted and unrestricted county road dollars. Road revenues grew 81.94% from 2000 to 2012 (Table 7). Actual expenditures rose 136.16%. After adjusting for inflation, revenues increased 40.01%. Because the number of road miles in the county decreased between 2000 and 2012, the per mile changes are larger than the totals (Table 7). Inflation adjusted revenues/mile increased 42.42%. (These stats assume 2000 and 2012 were representative years.)

Figure 7. Trends in Gasoline, Diesel + Special Fuel, Motor Vehicle Fees, and Gross Production Revenues for County Roads

Road Fund Sources of Revenue

Analysis of the primary road fund revenue sources lends insight into the existing and potential limitations on funding. Three individual revenue streams are displayed in Figure 7: (1) gasoline, diesel, & special fuel, (2) motor vehicle fees, and (3) gross production taxes. (Most counties have significant gross production tax revenues.) Gasoline, diesel, and motor vehicle fee revenues changed by -.64%, 30.74%, and -22.52%, respectively, (Table 8). Gross production grew by the largest amount. Of the principal sources of road funds only gross production and diesel grew faster than the rate of inflation.

| | Gasoline | Special | Diesel | Motor | Gross | Total from |

Table 8. Principal Road Fund Revenues

1. "County Estimate of Needs and Financial Statement" (State Auditor and Inspector form no. 2631, otherwise known as the "county budget report") for each fiscal year.

2. The Oklahoma Department of Transportation provided the certified number of miles of county roads.

3. "Economic Indicators" is a monthly U.S. Department of Commerce publication that contains consumer, producer, and implicit price deflator price indices.

4. Bureau of Economic Analysis data provided estimates of population, total county personal income, and per capita income.

5. Population information for 2000 came from the U.S. Bureau of the Census.

6. "State Payments to Local Governments," published annually by the Oklahoma Tax Commission, provided some information on general fund and road fund revenues.

7. "Economagic: Economic Time Series Page," <u>www.economagic.com</u>, contains a wide variety of economic indicators and statistics including price indices.

8. Federal Bank Reserve provided statistics for the CPI, IPD and PPI. http://research.stlouisfed.org/
